

BYOM

ADDITIONAL WIRELESS TRANSMITTER FOR SPEECHI BYOM SOLUTION

Ref.: SPE-BYOM-PRO-TX

This transmitter complements the Speechi BYOM solution SPE-BYOM-PRO*, allowing you to wirelessly share all types of content (images, videos, documents) on an interactive screen from your PC/Mac devices:

- Connection to audiovisual equipment (camera, microphone, speakers) to start your video conferences from your device.
- Up to 9 simultaneous connections for sharing on a single interactive screen (meaning up to 9 transmitters).
- Retrieval of touch to interact on a giant screen.
- Optimized transmission of your files (documents, images, videos) for smooth screen sharing.
- Plug-and-play via USB transmitter, no permanent software installation required.
- High stability and compatibility with all your devices (PC/Mac).

Works in combination with the BYOM Pro solution, which includes 1 transmitter and 1 receiver.

*BYOM = "Bring Your Own Meeting"

Recommended use cases: standard meeting rooms, training spaces, SMEs and public organizations, Full HD screen sharing and video conferencing, environments looking for a simple and cost-effective BYOM solution.

Performance may vary depending on the Wi-Fi network environment, connected device configuration, and the resolution of the displayed content.

Recommended video performance

Optimal performance: Full HD 1080p at 60Hz.
4K resolution is supported at 30Hz for presentation use.

DATASHEET

Compatible Operating Systems	Windows, MacOS, Android, Chrome
Refresh Rate	60 Hz (1080p), 30 Hz (4K)
Output Resolution	Full HD (1920 × 1080), 4K (3840 × 2160)
Number of Simultaneous Connections	9 simultaneous connections
Typical latency	Depends on the network environment
Included Accessories	1 transmitter
Connectivity	USB 3.0 Type-C × 1
Wi-Fi	2.4 GHz
Dimensions (L × H)	70 × 153 mm
Warranty	2 years return to workshop
