

VIDEO CONFERENCE

360° SPEAKER & MICROPHONE AUDIO KIT FOR VIDEO CONFERENCE

Ref.: SPE-A10

The SPE-A10 video conference audio kit is an ideal solution to extend the voice capture and broadcasting area for large-scale remote meetings:

- Plug and Play, this solution consists of 3 elements to place on your meeting room table (1 speaker, 2 microphones).
- Its main 15W speaker is equipped with 4 microphones capturing voices at 360° up to 5m.
- Its 2 satellite microphones extend the capture distance to 10m to adapt to the size of your room.
- Its intelligent sound processing is particularly effective at eliminating echoes and background noise, delivering only the essential to remote participants.
- Ideal for medium and large meeting rooms.
- Compatible with most video conferencing platforms (Zoom, Microsoft Teams, etc.).
