

VIDEOCONFERENCE

Wireless cascadable speaker-micro for small/medium rooms (5W/4m)

Ref.: SPE-AOC023TL

The SPE-AOC023TL speaker-microphone is suitable for both very small rooms and large meeting rooms for your video conferences:

- An ultra-flexible collaborative tool thanks to its wireless connection, offering total mobility and adaptability for your workspaces
- 4 built-in omnidirectional microphones with a capture range of 4 meters
- Can be daisy-chained for large meeting rooms (up to 3 speakers simultaneously)
- A long battery life of 6 hours of communication
- Integrated algorithm for echo reduction, background noise suppression, and volume control
- Compact, sleek, and lightweight design with intuitive controls to start your video conferences instantly
