# SuperGlass+ S™

The comfort of paper, **the advantages of digital**

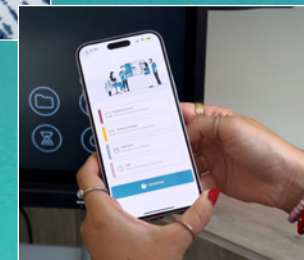

## Note 2.0 The limitless digital whiteboard

During meetings or class, access the digital whiteboard application Note 2.0 to present, illustrate, annotate, diagram, organize your ideas, brainstorm together, and share your work using the wide range of available tools.

## An experience that reflects you with Speechi Connect

A connected platform to access your workspace on a giant screen. A fast and secure connection via your smartphone ensures complete confidentiality of your data, as your space is personal and travels with you. Connect, share, and collaborate with a wide range of tools: one-click video conferencing, tool palette, file transfer... The screen adapts to your needs for a personalised experience.

## Go even further with a Windows OPS

Embed an OPS into your screen and expand your interactive capabilities, thanks to a Windows environment. You'll find your usual workspace and associated software on a giant screen (optional).
