SuperGlass™ 3
A state-of-the-art interactive experience
for limitless collaboration

An experience that reflects you
with Speechi Connect

A connected platform to access your workspace on a giant touchscreen. A fast and secure connection via your smartphone ensures complete confidentiality of your data, as your space is personal and travels with you. Connect, share, and collaborate with a wide range of tools: one-click video conferencing, tool palette, file transfer... The interactive display adapts to your needs for a personalised experience.

Do everything
with a multitude of tools

The SuperGlass 3 interactive display offers a wide range of features, making it the ideal tool for collaboration in any field you operate in: whiteboard, quick access sidebar with multiple tools, mirroring, picture-in-picture, etc.

A fully autonomous
giant PC

Choose an OPS PC and benefit from a fully self-sufficient Windows Pro workstation for your meeting rooms. Access the Microsoft suite and all your usual tools for collaboration and teaching on a giant touchscreen. No more visible cables or independent PCs (optional).
