Interactive and Collaborative Solutions

The giant Windows screen that facilitates your video conferences

An all-in-one screen designed for professionals

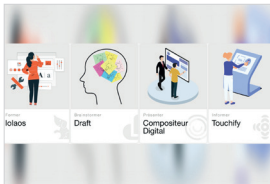

The SpeechiTouch Visio Windows screen is designed for remote and face-to-face meetings for professionals of all professions and backgrounds. Ergonomic, powerful and universal, it meets most meeting needs (project management, brainstorming, visual support, etc.)

It also solves all the obstacles preventing quality video conferencing by integrating both software power thanks to Windows and stable video conferencing tools without prior configuration.

Fingertouch and stylus differentiation

This technology allows the interactive screen to differentiate your finger from the stylus. More ergonomic, technology finger / stylus recognition is closer to users' habits in "real" life.

Optional Professional Software Suite

Thanks to the Windows PC integrated directly into your SpeechiTouch Visio, you can enjoy privileged access to the Speechi pro software suite: digital display, interactive presentation, project management software, etc.

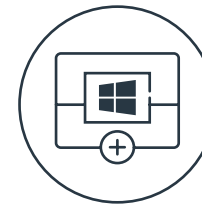

Video conferencing software

Use your favorite video conferencing software with the power of Windows, regardless of the number of participants and the length of the meeting: Zoom, Teams, Meet, etc.

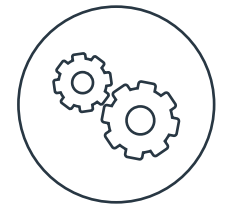

Integrated video conferencing tools

Thanks to the camera, speakers and network of microphones integrated into the screen, no need to add any additional devices for an effective collaboration.

Integrate Windows PC module i5

The SpeechiTouch video conferencing screen features a Windows i5 PC for more power, with no visible cables, natively.

SpeechiTouch toolbar

Available with one touch, the toolbar can be accessed at any time. It allows you to make notes and save them directly on the screen surface, take a screenshot, go to the previous page or to the homepage, zoom, etc.
