Education

In schools, Capacitive technology is perfect for the kids to learn how writing and drawing, thanks to the great writing comfort and precision the touchscreen offers (palm rejection and 1mm touch accuracy).

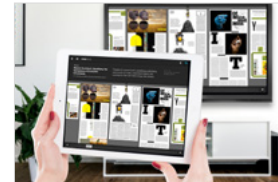

Finger/Stylus differentiation

This technology enables the touchscreen to differentiate your finger from the stylus on Android as Windows. More ergonomic, the recognition between your finger and the stylus is closer than the users' habits in real life.

Android applications store

Download Android free and ads-less applications from SpeechiStore. Each application of the SpeechiStore has been pre-tested to guarantee the compatibility with the touchscreen and the collaborative purpose.

Wireless mirroring on Windows interface

ByTello is a BYOD application which enables the broadcast of any type of screen (PC, tablet...) on your SpeechiTouch interactive display. Connect your device to the same network as the touchscreen and scroll the content directly from your device (touch transmitted).

Business

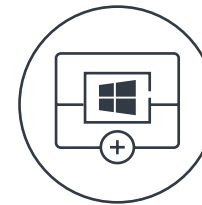

SpeechiTouch Capacitive display is the essential tool for all designers. With the ability to detect pressure, you can use design softwares for more intuitiveness and realism (Illustrator...). This high precision offers endless possibilities.

The Android giant tablet to make collaboration and learning easier

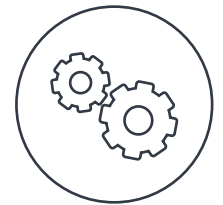

Complete and powerful interactive software

Note is a software that allows you to prepare and lead interactive presentations. Rich in digital and scientific resources, your presentations and courses take on a greater dimension.

Integrate PC and Android modules (option)

You can slot an OPS PC module into the edge of your interactive screen and enjoy a complete all-in-one solution. Upgrade your screen to a Windows 10 operating system without any cables.

SpeechiTouch toolbar

Available with one touch, the toolbar can be accessed at any time. It allows you to make notes and save them directly on the screen surface, take a screenshot, go to the previous page or the homepage, zoom, launch screen mirroring.

Specifications

Tactile technology: capacitive
4096 pressure levels
2 active styluses
